Demountable
Plain Bearing Bushings

6-2438-28 & 6-2438-65

Product Features

Demountable bushings are available in three profiles: extra long, long, and short shoulder to give optimum flexibility in die set design. The bushings are manufactured from hardened steel and are ideally suited for running with press fit or demountable posts. The bronze-plated bushings offer superior resistance to seizure, the major cause of bushing wear. They are recommended in high speed applications and where high side thrust loads are present.

Demountable bushings are tap fit into location and seat flush with the ground face of the punch holder. The bushings are held in place with toe clamps and screws which provide perfect alignment of the bushing with the bore perpendicular to the ground surface of the punch holder. The clamp and screws provide four times the holding power compared to pressed-in bushings, yet they can be easily removed and assembled thus simplifying die building and maintenance.

All bushings are equipped with figure 8 oil grooves and lubrication fittings.

NOTES:

- All demountable bushings are supplied with mounting clamps and screws. See page 32–33 for clamping dimensions or to order additional toe clamps or mounting screws.
- Bronze-plated bushings should not be pressed-in or honed.
- See pages 30–31 for die set boring specifications.
