Good Afternoon Gentlemen
What are the dimensions for the Clamp Slot depth and Width?

Regards
Patrick Castle

Good morning,

Were you able to look at any of the issues and questions below. We really want to get patterns ordered up, but want to makes sure we have all correct. On the 15140 it will be a tear up of design to try and get scrap out on the secondary press. Please let us know so we can keep these projects moving

Thanks
Ken

Craig and Chris,

1. Any answers to the press situation below
2. Is there a secondary press for the 15139(ETS5883)
3. Were you able to look at designs and verify any of the following?

Please verify for both jobs

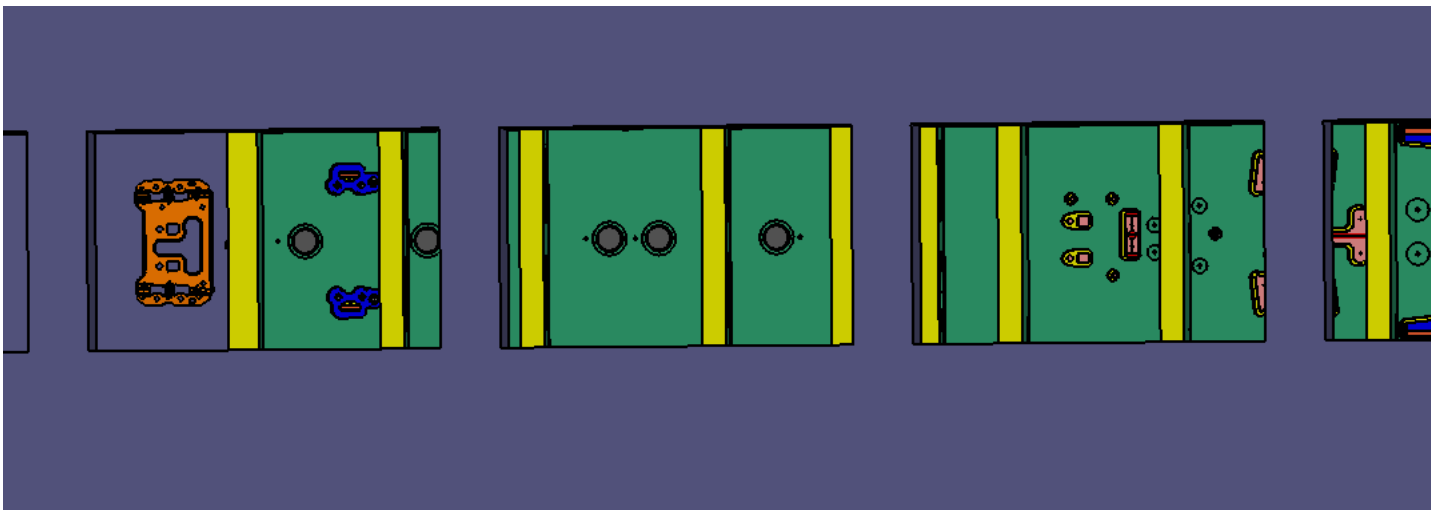

1. Clamping feet upper and lower
2. Shut height and feed height
3. Die locators

Thanks
Ken

Craig and Chris,

Our design team is saying scrap drop on the B-1 press is totally different. We had opening all down the middle on the other press Arisa D1(1st picture). B-1 press is below(2nd picture). What are we going to do about scrap drop.
